

It's Just A Little Prick...

Prevent hepatitis A - Get a shot!

- Hepatitis A is on the rise among gay, bisexual, and other men who have sex with men who are not vaccinated
- Hepatitis A is a virus that can cause jaundice (yellow skin or eyes), fatigue, stomach pain, and rarely death
- People can carry hepatitis A in and around their anus; getting just a few germs in your mouth can make you sick
- Hepatitis A can spread to others from oral or anal sex

**Ask your doctor, or visit vaccinefinder.org
to find places that give hepatitis A vaccines**

Call the Adams County Health Department vaccine clinic at 303-451-0123 for information about where to get free or low-cost, con idential vaccines
