

# Food Truck and Trailer Plan Review Form

Trucks and trailers that contain a commercial kitchen and have never been licensed by Adams County Health Department must submit plans for approval prior to being licensed.

PLEASE NOTE: Pushcarts and mobile food units that only sell pre-packaged foods are not required to submit plans for approval prior to being inspected for licensing. Operators of pushcarts and mobile food units that only sell pre-packaged foods may contact one of the following offices to arrange for an inspection:

Aurora: 303-363-3055 Greenwood Village: 720-200-1670 Commerce City: 303-439-5959

Please refer to the Colorado Retail Food Establishment Rules and Regulations for definitions of mobile food units and requirements at <a href="http://www.tchd.org/DocumentCenter/View/528">http://www.tchd.org/DocumentCenter/View/528</a>. Becoming familiar with the regulations will help you answer questions when completing the plan review packet. Please refer to the attached Policy for Mobile Food Facilities for additional information.

# **Submitting Plans**

Adams County Health Department is concerned about the time and expense involved in starting a mobile retail food establishment business. The enclosed form must be completely filled out including the finish schedule and an email address. Failure to include all requested information may delay the review and/or approval of your plans.

Please verify that this establishment is going to operate outside of the City and County of Denver.

Refer to the end of page 2 for the checklist of information that is to be submitted for plan review.

Submit plans to Adams County Health Department at one of the following locations:

4430 S. Adams County Pkwy., Ste C1700 Brighton, CO 80601

#### Fees

A \$100 plan review application fee must accompany each set of plans for the initial review.

In addition to the \$100 plan review application fee, a fee based on \$60.00 per hour, not to exceed \$580.00, will be assessed for our time spent conducting the plan review, consultations in the office or by phone, and pre-opening inspections.

Unless an operator is verified to be a specific type of non-profit, license fees range from \$270.00 – \$385.00. Licenses expire on December 31<sup>st</sup> every year and are **not** pro-rated.

All fees must be paid in full prior to receiving an approval to operate.

S-385 PLAN REVIEW COVER LETTER REV. 8/22

#### **Review Process**

We do not offer an option to expedite the plan review. Plans are reviewed on a first come first serve basis.

The Primary Contact, as listed on page 3 of this application, will be notified within 14 business days of the plan submittal date if the plans are accepted, or if more information or changes are needed.

Non-approval of plans will require submission of revised plans and may take up to another 14 business days for notification.

Once a written approval of the plans is received by the Primary Contact, an inspection may be scheduled.

If the plans change after they have been approved by this Department, the plans must be re-submitted for approval. This review may take up to another 14 business days for notification.

### **Required Inspections**

It is the responsibility of the Primary Contact or their designee to schedule the inspections of the mobile food unit. <u>All inspections require a minimum 5 business day notice</u>. Inspections are to be scheduled by calling the phone number provided in the plan review approval letter.

Unless the operation is exempt from licensing by the Colorado Retail Food Establishment Rules and Regulations, a Retail Food License is required in order for any food to be handled or prepared. This includes food handling for training purposes.

In general, plan on 2 inspections. The first inspection is to assure the plans approved by this Department were followed and to look for other issues that must be corrected prior to licensing. The inspector will leave a list of items with which to comply before scheduling the second inspection. If no issues are observed during the first inspection, the licensing will take place at that time.

Have the following items ready for the inspection:

- 1. All work on the mobile food unit is complete and in compliance with the Colorado Retail Food Establishment Rules and Regulations.
- 2. The mobile food unit is thoroughly cleaned.
- 3. All equipment is working properly (all refrigeration at 41° F or less)
- 4. All items noted in the plan review approval letter and in previous inspection reports have been addressed.
- 5. The Colorado State Sales Tax license is provided to apply for a Retail Food Establishment License.
- 6. All remaining plan review fees and the license fee are paid in full. No checks will be accepted.

# POLICY FOR MOBILE FOOD FACILITIES

- 1. POLICY FOR MOBILE FOOD FACILITIES: (Trucks, trailers, pushcarts) LICENSING: New mobile hot trucks and trailers that have not been previously licensed by ACHD shall submit a plan review for licensing to the office closest to the mobile unit's commissary. Relicensing of trucks, trailers and push carts for the calendar year shall be done by appointment at a ACHD EH office by any assigned EHS. The Truck/Push Cart Licensing Checklist shall be used for this inspection. This licensing will constitute one inspection for the year, and the inspection should be entered in the computer.
- 2. **IDENTIFICATION:** All mobile food facilities shall be identified with the trade name and contact information of the owner/operator. The name shall be provided in letter or numerals at least three inches high with at least 3/8-inch wide brush strokes. The color of the letters or numerals shall be of a contrasting color to that of the mobile food establishment's exterior. All of the above are to be clearly and permanently indicated and visible.
- 3. **CONSTRUCTION:** Mobile food facility equipment, including but not limited to the interior cabinets and compartments shall be smooth, easily cleanable, durable, non-toxic, and readily accessible for cleaning. Minimum grade material shall be stainless steel, FRP or its equivalent. All gaps, voids or openings shall be sealed. See Truck/Push Cart Licensing Checklist.
- 4. **EQUIPMENT:** All equipment on mobile food facilities (i.e. espresso machines, refrigerators, shaved ice machines, sinks, etc.) shall comply with the Colorado Retail Food Establishment Rules and Regulations.
- 5. **OPERATION:** During operation, no food intended for retail sale shall be conveyed, held, stored, displayed or served from any place other than the mobile food facility (no extra tables, racks, equipment, etc.). Mobile units must have self-contained power supplies for hot and cold holding equipment; however, an external power supply, in addition to the self-contained power supply, may be used when available as permitted by the local building department. Storage of food and beverages in ice chests are acceptable for pushcarts. An additional table for condiments and non-potentially hazardous foods is permitted.
- 6. **APPROVED SOURCE:** All packaged foods and approved unpackaged food on the mobile food facility shall be obtained from an approved source.
- 7. **FOOD PREPARATION:** Pushcarts: Potentially hazardous foods prepared on pushcarts will be limited to cooking/grilling hot dogs, commercially preformed frozen hamburger patties and commercially precooked chicken patties. Potentially hazardous foods that are prepared, wrapped and properly labeled at the commissary, wrapped for resale and maintained at 41°F or below or kept at 135°F or above on the push cart will also be allowed, i.e. barbeque, tacos, burritos and tamales. Hot trucks/trailers: Hot trucks and trailers will be allowed to cook/grill potentially hazardous food on the truck/trailer or at an approved outside grill. All final assembly and serving of grilled foods must be done on the mobile unit.
- 8. **TOILET FACILITIES:** Mobile food vendors operating at a fixed location shall have a rest room conveniently located and accessible for employees. An Affidavit of Employee Rest Room Availability for that specific location shall be provided to ACHD by the mobile food vendor.
- 9. **TEMPERATURES:** All mobile food facilities from which potentially hazardous foods are sold or offered for sale shall be provided with equipment to maintain adequate, safe temperatures of 41°F or below or 135°F or above.

- 10. **WASTEWATER:** All wastewater shall be disposed of into the approved wastewater receptor at the commissary, i.e. floor sink or floor mounted mop sink.
- 11. **SINKS:** A minimum of a hand sink with paper towels and soap in approved dispensers shall be provided. A sink shall be located on the operator's side of the mobile food facility and shall be easily accessible. Portable handsinks that are not an integrated part of the mobile unit are not allowed. The sink shall be furnished with hot (minimum 100°F) and cold running water under pressure through a mixing faucet that permits both hands to be free for washing. Hot trucks and trailers may also have a three compartment sink to wash, rinse, and sanitize utensils and equipment. Hot water (minimum 110°F) must be provided at the wash sink. Water pressure at hand sinks shall be sufficient to fill a 16-ounce container in a minimum of 8 seconds.
- 12. **POTABLE WATER SUPPLY:** The potable water tank and delivery system shall be constructed of approved materials, provide protection from contamination and shall be of capacity commensurate with the level of food handling activity on the mobile food facility. Push carts with a hand sink only shall have a minimum of a 5-gallon potable water tank. The size of potable water tanks for hot trucks or trailers with a hand sink and three compartment sinks will be dependent on the size of the sinks. The potable water tank inlet shall be provided with a connection of a size and type that will prevent its use for any other service and shall be constructed so that backflow and other contamination of the water supply is prevented. Hoses used to fill potable water tanks shall be of a food grade material (the use of "garden hoses" is not authorized).
- 13. **WASTEWATER TANKS:** Mobile food facilities shall be equipped with a permanently installed wastewater holding tank. The wastewater tanks shall be at least 15% larger than the potable water tank. At a minimum: Push carts with a hand sink only shall have a holding wastewater tank of at least 5.75 gallons. Holding tanks for hot trucks and trailers with a hand sink and, three compartment sink if applicable, will be a minimum of 15% larger than the potable water tanks. All waste from sinks must drain into the holding tank.
- 14. **COVERS/SCREEN**: Pushcarts shall have a cover or umbrella over the cart during food service operation. Mobile trucks and trailers shall be protected to prevent insect and rodent entry. The service window must be self-closing or protected with an air curtain to prevent insect entry.
- 15. **COMMISSARY:** All hot trucks, trailers and pushcarts must operate and shall report daily to approved commissary or a base of operations approved by the Department. Mobile units shall provide ACHD with a new Affidavit of Commissary letter at initial licensing and each year at license renewal. If the commissary is changed during the year, a new commissary letter shall be provided for ACHD approval. Commissaries shall not be approved if the facilities cannot service the mobile units or are located outside Adams County. Commissaries located in the City/County of Denver will be approved only if the mobile unit is already licensed by Denver Department of Public Health and Environment. Other local commissaries outside of ACHD with the sole intent to provide commissary services to mobile food units may be accepted.
